

Lamprobe After Care

2051 Hamill Road, Suite 301
Hixson, TN 37343

Lamprobe Home Care Instructions

SKIN TAG REMOVAL:

After treatment with the Lamprobe, the areas treated may feel:

1. Irritated as well as redness and scabbing may form.
2. Make sure you do not pick at the scabs because prematurely removing the scabs may cause hyper pigmentation or scarring.
3. If the area is irritated you can apply Polysporin. This is an over the counter product. Keep the area dry during the day.
4. Must use sun protection in the day all year round.
5. Avoid direct sunlight during the peak hours (11 a.m. - 5 p.m.).
6. When cleansing the face or showering, use mild products without alcohol.
7. Pat the area dry instead of rubbing to prevent removal of the scab.
8. Do NOT use any other form of peeling or bleaching products for at least 21 days.

All other areas:

After treatment with the Lamprobe, the areas treated may feel:

1. Irritated and redness may form.
****KEEP A THIN LAYER OF VASOLINE TO PREVENT SCABS FROM FORMING
AND USE POLYSPORIN FOR IRRITATION, SCABS CAUSES SCARS!**
2. Must use sun protection in the day all year round.
3. Avoid direct sunlight during peak hours (11 a.m. - 5 p.m.).
4. When cleansing the face or showering, use mild products without alcohol.
5. Pat the area dry instead of rubbing.
6. Do NOT use any other form of peeling or bleaching products for at least 21 days.
